I'm a commercial driver and an XM radio subscriber. I drive through out the entire state of Florida. XM's programming and technology are essential to my job, especially the traffic and weather from multiple cities. When I'm approaching a city that XM provides traffic and weather for, it's nice to be able to get reports instantly. So I urge the FCC to reject NAB's petition 04-160 and support me as a U.S. citizen to the right to choose services, programming and technology that I pay for. The NAB does not need to dictate what I choose to listen to and/or pay for services.

Thanks, Amos W. Angelow, Jr.
